# HOW TO MAKE

GOAL
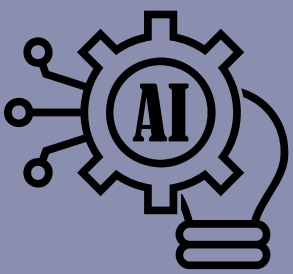

> So that you understand how to create a website that is conherent and structured so that it becomes neat.

TOOLS

1. Laptop/PC
2. Network

DIYO ALBANI X-PPLG 2 13
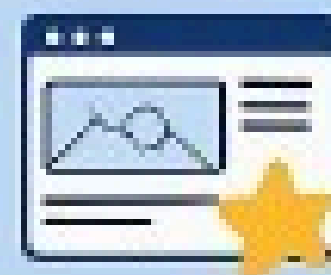

A PERSONAL WEBSITE PORTOFOLIO

Steps

1 Find a reference for the website design that you will create.

2 After getting a design reference. create a flow chart for the website you will create. First you can create with Figma...

3 After create flow chart, you can create UI design or website appearance according to flow chaff, for example with Bootstrap and

4 After design finished, you can continue with coding, using the VSCode application or with a text

You Did IT!
